- Playing Badminton

LANGUAGES

- English
- Hindi

OBJECTIVE

Seeking a role to enhance and explore my technical knowledge in frontend which includes HTML,CSS,JS and React JS. I am eager to learn about back-end and overall how to work and get used to with work environment as well.

PROJECTS

Responsive E-commerce website

Basically I made this e-commerce website design using (HTML & CSS,) where majorly I use flexbox, positioning, media queries, transition,pseudo elements and many more interesting topics used here .

- <https://riya-ecommerce-website.netlify.app/>
- <https://github.com/Riyatyagi284/Ecommerce-website1.git>

Weather App

I made this using (HTML,CSS, JAVASCRIPT). In this project I learnt a lot more about API'S basically in this there's a search bar where user can search weather of any city , Also by giving the access of user current location it can also provides the weather of that area as well.

- <https://github.com/Riyatyagi284/Weather-API-Javascript-Project->

React (Tour Plan Website)

This is a basic react website in which I provide [add delete and refresh] functionality buttons . Mainly I used useState Hook here and some javascript concepts.

- <https://github.com/Riyatyagi284/Tour-Plan-With-Me>

React (Blog Website)

I made this website using Context API ,useEffect and useState Hook. Here,in this there are six pages and all six pages data updated dynamically also apart from this I added next and previous button functionality in this website .
