## PROJECTS

### Project Name: Random pasword generator

Role: Designing

Team Size: 5

Project Duration: 1 Month

#### Project Detail

Passwords are a means by which a user proves that they are authorized to use a device. It is important that passwords must be long and complex. It should contain at least more than ten characters with a combination of characters such as percent (%), commas(,), and parentheses, as well as lower-case and upper-case alphabets and numbers. Here we will create a random password using Python code
