- Developed a **Movie** search App Using React Js, **React Rout DOM** and use **Tailwind** to beautify UI.
- Use **React Hooks** like useState and useEffect to Fetch Data and use function like asysnc and await.
- Fetch Data From **IMDb** API to fetch live data to show the details of selected and entered movie.

**Management System**  C++

- Create a Desktop Application using **C++ ,Object Oriented** Concept like class and object, Inheritance,polymorphism.
- Application has two part Login as **Student** and **Teacher**,data stored and open in binary mode for more security.
- Teacher can access all Data of **Student** and **Student** can check their **Marks** ,it also store data.

## CODING PROFILE

- **Leetcode** - 3\* Solved **400+** Problems of Data Structure and Algorithms and given15+ contest. [Link](#)
- **CodeStudio** - **Expert** Solved **280+** Problem of Data Structure and Algorithms . [Link](#)
- **GeeksForGeeks** - **1500+** Points Solved **500+** Problems of Data Structure and Algorithms [Link](#)
- **CodeChef** - 2\* Solved more than 180+ question and given 30+ contest current rating is **1478**. [Link](#)

## CERTIFICATES

**React.Js Essential Training**

- After completion of React.Js Essential Training get certificate from LinkedIn. [Link](#)

**OOPs In C++**

- Completed OOPs in C++ guided path on CodeStudio and get Certificate from CodeStudio. [Link](#)

**Front-End Development – CSS**

- Get certificate from Great Learning after completion of Front-End Developement-CSS [Link](#)

## POSITION & RESPONSIBILITY

**HackerEarth Campus Ambassador (HECA)**

- Selected as HackerEarth Campus Ambassador responsibility is to organized Contest,Hackathon,Webinars.

**Newton School Coding Club-AGC | President**

- President of Newton School Coding Club AGC.
- Responsibility is to assist the team of 15 people and organize Coding Contest, Hackathon, Webinars .
