Projects

Crowdfunding Using BlockChain

Block-Chain in Crowd-funding is a relatively new concept to the Community. The Crowdfunding platform in block-chain makes different possibilities for the startups by raising the funds to create their own digital currency and it is peer-to-peer fund raising model. Some of the famous crowdfunding cryptocurrencies are coinspace, swarm etc. Crowdfunding has offers for creators as well as for consumers. Anyone can participate in this crowdfunding if they have invented any new Cryptocurrency (e.g. Ethereum) and also can contribute as much as they want.

Online Blood Bank Management System

This is a web-based application which ensures :

- Hospitals to have good supply or inventories of blood bags.
- To check the availability of blood bags anytime.
- To manage the information of its blood donor.
- To allow good documentation about the donor and its blood donation activities.
