PROJECT

Weather forecasting web app

Current weather provider

- I successfully completed a weather forecasting project using HTML, CSS, and JavaScript, showcasing my skills in web development and data integration. The goal of this project was to create an interactive and visually appealing weather forecasting application.

Password Generator website

Unique password generator

- I developed a password generator website using HTML, CSS, and JavaScript, providing users with a secure and convenient way to generate strong passwords. The primary objective of this project was to create a user-friendly interface that generates random, complex passwords tailored to individual requirements.
