## PROJECTS

### GITHUB DEV FINDER

HTML, CSS, JAVASCRIPT, OFFICIAL GITHUB API

- A web app to find user info of github user with the help of his github-username.
- Here we can see profile-info, profile-photo, repo-info and social-info of any github user.
- Profile data is coming from official Github API.

### WEATHER APP

HTML, CSS, JAVASCRIPT, OPENWEATHERMAPAPI

- Realtime Weather Application.
- Where user can search weather-status by entering cityname/country-name to get realtime weather-information.
- And app contains relative images based on weather category and also 404 page is render if user enter wrong city/country name.

### MODERN TODO APP

REACTJS, SCSS, FRAMMER-MOTION, REACT-HOT-TOAST

- A Modern Todo App Created with ReactJs.
- User can add, edit, and delete todo.
- I used local storage of browser to save todo-items.
- Also filter todo functionality is added where user can check status of todo-lists.

### DEV.TO CLONE WEBSITE

REACTJS, SCSS, OFFICIAL DEV.TO API

- Created dev.to official forum website clone.
- Where Posts are dynamic and coming from dev.to official API
- Added infinite scrolling feature, smooth transitions, and animations using framer-motion.
