EDUCATION

Bachelor of Technology Birsra Institute of Technology, Sindri	2019 – 2023 Dhanbad, India
12th D.A.V. Public School, Hehal	2016 – 2018 Ranchi, India

EXPERIENCE

Software Developer Intern GeeksforGeeks	12/2022 – Present Noida, India
<ul style="list-style-type: none">• Worked on 7+ user facing pages and 10+ internal projects with Next.js.• Implementing API calls using RTK Query.• Building API endpoints using Django REST Framework.	
Software Developer Intern Vibencode	02/2022 – 03/2022 Madhya Pradesh, India
<ul style="list-style-type: none">• Implemented Next.js to decrease the load time of webpage by 9%.• Implemented SSR to speed up the response time by 7.5%.	

SKILLS

Programming Languages

Java, Javascript, HTML, CSS, Python

Tools / Platforms

Git/Github, VScode

Libraries/Frameworks

ReactJS, React Native, Redux, Next.js, Tailwind CSS, Express.js, Django REST Framework, Memcached, Redis

Databases

SQL, Firebase, MongoDB

PROJECTS

NiK - eCommerce App [🔗](#)

React Native, Firebase, Redux, Express.js

Built an eCommerce app using **React Native**. Authentication and database is handled by implementing **Firebase** Cloud Function and includes **Express.js** for providing payment processing through PayTm . You can enjoy seamless experience of an eCommerce app.

Jarvis - Group Chat [🔗](#)

React Native, Expo, Firebase

This project is build in **React Native** empowered with **Redux** and **Firebase**. This app has authentication feature, realtime chat updates, custom group create feature to start new chats and much more. There is one tap log out feature too.

Netflix Clone [🔗](#)

React, Firebase, Redux, Axios

This is a Netflix clone built using **ReactJS**. Under the hood, **Firebase** and **Axios** are used for data management, authentication and **REST API** calls to get the movies from database. For state management of users, **Redux** has been used.

Spotify Clone [🔗](#)

Next.js, Spotify API, Recoil, Tailwind CSS

This project is built using **Next.js**, with user authentication and persistence to user log in state using **Spotify API** and **NextAuth** along with Next.js middleware implementation. You can play pause songs and switch between songs easily. Also **Recoil**, for better state management and **TailwindCSS** for the awesome responsive UI.

ACHIEVEMENTS

Solved 300+ problems at Leetcode and GeeksforGeeks [🔗](#)

Javascript, Java and React Certificate by Hackerrank [🔗](#)
