JAYPEE UNIVERSITY OF INFORMATION
TECHNOLOGY ,Solon
(09/2020 - 06/2024)

About Me

Determined and knowledgeable Software Developer able to think creatively. Fresher eager to work with all types of personalities. Seeking opportunity to hone my skills.

Projects

Website

Made a E-commerce website using Mern.

Todo App

This project was made using React and json . Its a todo app in which we can add or delete things that we have to do .

Student Management Record System

This C++ project structure about knowing about the system of file management. The program designed by you will be ready to accumulate all the students' data and information correctly. This data can be any information related to the student, their personal information, academic records, roll number, etc.

Alarm Clock with GUI

The objective of this project is to implement an alarm clock using Python. Python consists of very useful libraries such as datetime and tkinter which help us to build this project using the current

Calculator

I made a graphical user interface calculator using Tkinter library in which we build buttons to perform different operations and display results on the screen.
