About Me

Successful Front End Developer with diverse and extensive experience focusing on semantic and standards compliance. Reliable, predictable, and persistent. Team-oriented with excellent interpersonal communication skills. Motivated to combine the art of design with that of programming. Proven achievement in agile-based time-managed projects from working in large teams to one-on-one client-focused bespoke websites. I believe the best design comes from establishing problems specific to a project and then solving them in the simplest way possible. Considered an innovative team player with a reputation for integrity and quality.

Professional Experience

BeanGate IT Solutions Pvt. Ltd. | Front-End Developer

2022/01 – Present

Responsibilities:

- I built reusable code that could be utilized in other projects, saving the company time and money.
- Specialized in front-end framework construction using Bootstrap.
- Contribute to user experience discussions with a technical and pragmatic perspective.
- Translate UI/UX design wireframes to actual code that will produce visual elements of the application.
- Design and build large-scale projects.
- Work closely with UI/UX designers and bridge the gap between graphical design and technical implementation.
- Promote and define project standards for JavaScript development.

BeanGate IT Solutions Pvt. Ltd. | Front-End Developer Intern

2021/07 – 2021/12

Responsibilities:

- Developed responsive web designs that are suitable for a modern web accessed via many different types and sizes of device, such as TVs, mobile phones, tablets, and desktop computers.
- Designed to achieve the aims of the project and provided users with a quality experience during their interaction with the product.
- Liaised with the client and the software development team to deliver the project goals inside a deadline.
- Recommended approaches for UI/UX considering time to market.
