COURSEWORK / SKILLS

- Data Structures & Algorithms
- OOPS
- SQL
- DBMS
- Web Development
- Operating System
- Computer Network

PROJECTS

Students Result Management System 🔗 | [Java](#) , [Java Swing](#) , [MySQL](#)

- The Students Result Management System is an online application designed to manage the results of students in a school.
- It simplifies the process of managing student results, reduces the workload of teachers, and increases the efficiency of the school administration.
- The system has several key features, including a user-friendly interface that is easy to navigate, a student profile that stores all information related to each student, course management, result management that stores and manages the results of each student for each course.

Notes (Clone) 🔗 | [HTML](#) , [CSS](#) , [JavaScript](#)

- This is a customizable note-taking platform that allows you to create, edit, and organize notes and designed to be user-friendly, with an intuitive interface and simple navigation.
- Implemented CRUD functionality (Create, Read, Update, Delete) to allow users to create, edit, and delete notes.
- Used local storage to store user data and ensure persistence across sessions.

Compressor-Decompressor 🔗 | [Java](#) , [Java Swing](#)

- The Compressor-Decompressor is any dual-function device or application that compresses and decompresses a data object or file.
- It enables the compression of data or files and the subsequent reversal of the compressed data to its original state.

TECHNICAL SKILLS
