PERSONAL PROJECTS

Music Player

- Technology used:- HTML, CSS, JAVASCRIPT
- A music player project in JavaScript would involve using audio file which I created myself to play audio files and implementing features such as a user interface for controlling playback and displaying song information.

E-Commerce Website

- Technology used:- HTML, CSS, JAVASCRIPT
- Developed a dynamic e-commerce website using HTML, CSS, and JavaScript to provide users with a visually appealing and intuitive online shopping experience. Created responsive web design techniques to optimize the website for mobile and desktop devices, incorporated product listing and filtering functionalities.

NewsApp

- Technology used:-React.js
- Developed a dynamic News App using React, and integrated API calls to fetch real-time news data from external sources. Utilized React components and state management to create a responsive and interactive user interface, allowing users to browse and search for news articles based on their preferences.

E-Commerce Website

- Technology used:- React.js
- Developed a dynamic e-commerce website using React.js, leveraging APIs to fetch all types of categories of data and to fetch to details of and list of particular category of product and full details of a particular product. Managing quantity of products in cart using useContext. Use LocalStorage for storing the cart data.
