SKILLS

Languages	- HTML, CSS, Javascript , Java, SQL(MySQL),
Frameworks/Libraries	- React JS, Redux, Springboot,
Developer Tools	- Git, Github, Hibernate
Problem Solving	- Data Structure and Algorithm (Java)
IDE	- IntelliJ, VS code, NetBeans

PROJECTS

CryptoTracker

Developed a Crypto Tracker website on react which provides real time information about crypto currencies and also lets user to compare two currencies on the basis of prices, market cap and total volume with graphs.

- Routing handle using react-router
- DashBoard page to show info in grid and list view, with search and pagination feature.
- Coin Page for showing detailed information for particular coin with graph.
- Compare page for comparing two crypto currencies with graph
- Technologies used - React Js, Material ui, Chart Js,, React-router, Coingecko API, Framer motion.

MeShop

Created a shopping application with cart and the concepts i've learned include promises, async await , using storage APIs and basic API calls while also dealing with complex DOM Manipulations

- Signup and login handle using local storage for multiple users
- Fetching of products using api - in the shop page and saving the products in localStorage
- Shopping cart handle using localStorage, checkout functionality of my cart using razorpay test mode
- Profile page - Allowed users to edit data and change password..
- Software/Language/Framework used - VS Code, HTML, CSS, Javascript.

FoodOrderCart

Developed a simple food order cart application using React Library. The concepts i've learned includes how to use firebase with our app, and how to create context using ContextAPI.

- Landing page having food details fetched from firebase
- Cart modal with form for order details.
- Technologies Used - CSS, React, ContextAPI.

EDUCATION

ALIGARH MUSLIM UNIVERSITY
Bachelor of Science(Mathematics)

GPA: 7.5/10
Aligarh, U.P.

INTERESTS/HOBBIES

Badminton – Represented University in an Inter-University badminton tournament twice.
