WORK EXPERIENCE

Full Stack Developer

Infobiz Business World Trade

Noida

This B2B platform enables seamless communication and digital transactions between wholesalers and retailers, simplifying their business interactions

Responsibilities

- Developed the B2B service company website from scratch using JavaScript, ES6, React and Redux Understanding the requirements of the company.
- Building the Backend using Express and Nodejs
- Created reusable react components and managed application state using React-Redux.
- Assuring Quality of code by detecting the root cause of defects, Bugs issues and giving best coding practices resolutions.
- Maintaining and modifying website as per client requirements.

Additional Projects

During my internship, I had the opportunity to work on designing websites and templates for the first two months. This experience allowed me to develop my skills in web design and helped me gain a deeper understanding of the importance of user interface and user experience.
