PERSONAL PROJECTS

To-Do-List

[Link to To-Do-List](#)

To-Do-List is a full stack web development project using Html, Css and Javascript as client side and Node.js as server side. It cannibalize mongodb as it's database. You can easily create your list for the day even cancel the one out which have been done.

Keeper

[Link to Keeper](#)

Keeper is a versatile note-taking website that leverages the power of the MERN stack (MongoDB, Express.js, React.js, and Node.js) to provide a seamless and efficient experience for jotting down and managing your notes. Whether you need a place to quickly jot down ideas, create to-do lists, or organize important information, Keeper has you covered.

NewsBooster

[Link to NewsBooster](#)

Newsbooster is a REACT based news website which employs the news api to fetch daily news on global political,social and buisness issues.

TextUtils

[Link to TextUtils](#)

TextUtils is a react based simple website which helps you format your text. You can even change the mode of website according to your eye comfort. The buttons work on simple javascript functions.
