PROJECTS

Student-Management system

Web-based system using HTML, CSS, and JavaScript with Google Docs as the backend. Prospective students can inquire about admission and faculty can manage details of student who enquired.

Static Website

Designed and developed a static website using HTML and CSS. The website showcases information about a fictitious company, including its products and services, team members, and contact information.

Portfolio Website

Created a personal portfolio website using HTML, CSS, and JavaScript. The website showcases my skills, projects, and experiences, and includes interactive features such as animations and contact forms.
