KEY DEVELOPMENT PROJECT

Online Cake shop System-

It is a system that allows users to check for various cake available at the online store and purchase online. The project consists of list of cakes and bakery products displays in various categories. The user may browse through these items as per categories if the user likes a products he may add it to his shopping card.

He may even pay through a credit card or cash on delivery. Once the user makes a successful transaction. He gets a copy of the shopping receipt on his email id. User has also option for ordering custom cakes according to their requirements like cake's flavor, size shapes and so on.

ACADEMIC PROJECT

Library Management System-

A college library management is a project that manages and stores books information electronically according to student's needs. The system helps both students and library manager to keep a constant track of all the books available in the library .It allows both the admin and the student to search for the desired book.it becomes necessary for colleges to keep a continuous check on the books issued and return and even calculate find.

To keep track of information such as issue date, last date to return the book and even five information.
