Gh Rasisoni institute of technology
Bachelor's degree, Computer Science
Mar 2019 - Jun 2022

Licenses & Certifications

Foundations of Cloud Computing Course - Codecademy

Skills

filddler • New Relic • Transact-SQL (T-SQL) • Node.js • Bootstrap • JavaScript • React.js • React Hooks • SQL • HTML

Projects

codecademy store

Project Link ： https://codecadmy-store.vercel.app/

It is a e-commerce website that mimics Codecademy store
it can be implemented using redux and refactored by using react hooks ,the application should display products from the Codecademy store and allow the user to add them to their cart. In the cart, the user can adjust the quantity of each item and the running total will be displayed at the bottom. Lastly, the user can choose the currency for the entire application.
