## Work Experience

➔ **Canara Hsbc life insurance          (Feb 11, 2022 - Current)**
Working as a Full-Time Employee From Day one in the office

- Worked with CGP Team (Central Payment Gateway) where I built and tested 3 APIs from two CRs (change request). Went from local development to UAT to Production and performed unit testing.

- Completed the assignment of making POC of Alexa Skill, Choice Alexa Skill in which the user enters the phone number through a web interface, using the phone number had to fetch the policy details for the user.

- Worked on the ISNP project, the platform where customers can buy plans. Based on GATSBY (React Framework), NodeJS(ExpressJS), and Strapi(CMS).  Fixed reported production bugs. Worked with the Business to understand the Change Requirements and implement them in the project.

## Projects

➔ Reddit Clone

- Utilized several technologies for the backend, including Express, MySQL, TypeORM, and Type-Graph.

- On the frontend, I employed Next.js, URQL client, Chakra UI, GraphCache, and TypeScript.
- My objective was to replicate the functionality of Reddit, encompassing features such as creating posts, upvoting/downvoting, and efficiently managing the cache on the frontend. And Dockerized it.
