SUMMARY

To secure a challenging role as a frontend developer and contribute my skills and expertise to create exceptional user experiences for web applications. Deeply passionate about creating intuitive and visually appealing user interfaces that deliver exceptional user experiences. Experienced in collaborating with cross-functional teams to deliver high-quality software products on time and within budget.

EXPERIENCE

Frontend Developer React js & Vue js
eQuasar Web Solution   **October 2022 - Present, Ludhiana , Punjab**
· Developed functional user interface using Vue Js & React Js, improved website speed by 20%, resulting in a 40% increase in website traffic.
· Constructed efficient code structures, debugging, testing and debugging code, ensuring pages render correct information in multiple browsers.
· Collaborated with the design team to create a unified look across all webpages, enhanced the user experience of the website based on customer feedback.

PROJECTS

https://sushmadev.isdemo.in
Sushma Real States. · December 2022 -April 2023
· As a frontend developer for the Sushma Real States project, I was responsible for designing and implementing the user interface using the Vue.js framework. My main tasks included creating components, templates, and routes, as well as integrating with HTML, CSS, and JavaScript. I also worked closely with the backend team to ensure seamless communication between the frontend and backend, and to fetch and update data as needed.
· Designed and implemented a user-friendly interface for property listings, allowing users to filter and sort properties based on various criteria.
· Developed a responsive design that adapts to different screen sizes, ensuring a consistent experience across devices.
· Implemented data visualization components using Vue.js and charting libraries to provide users with valuable insights into the real estate market.

https://majimedev.isdemo.in
Majime Multi Vendor Ecommerce · November 2021 -April 2023
· Developed, implemented, and maintained a web application using Vue as a frontend and Work on Billing Modules and Product Insert and products Details and Different types of filter.
· Created multiple components like Customer,products,billing with Vue and optimizing query-performance to ensure faster response time, enhanced product insights by 400% through data manipulation and visualization.
