PROJECTS

Ed-Tech Learning Android App   Dec 2022 - 2023
- Developed an educational Android app in Android Studio offering a range of learning modules and interactive features like interactive learning modules, quizzes, progress tracking, and personalized learning paths for an improved user experience.

Waste Food Management System - ReFoodify Global   Mar 2023 - May 2023
- Designed and developed an online platform for ReFoodify Global, an NGO focused on waste food management. Leveraged modern techniques to create a user-friendly interface for food donation and waste management. Implemented various features to streamline the donation process and ensure efficient distribution to those in need.

ChatBot - OpenAI   Jan 2023 - Jan 2023
- Developed a chatbot using OpenAI's GPT-3 engine to provide natural language conversations. Improved user experience by leveraging AI and provided a user-friendly interface.

IT Training Firm   Jan 2023 - Jan 2023
- Developed a website for a client's IT training firm, delivering a user-friendly and engaging platform to showcase their services and training programs, information and training materials. Implemented various features to enhance website functionality and user experience.

My portfolio   Dec 2022 - Dec 2022
- I designed and built two websites as part of my portfolio. The first website showcases my skills in the latest neumorphism design technique, while the second is a simple yet modern design. Both demonstrate my ability to create visually appealing and user-friendly websites.

- URL 2: https://akashma.netlify.app/

Portfolio for Client   Oct 2022 - Oct 2022
- Developed a personalized portfolio website for a client, showcasing their skills, experiences, and accomplishments. Implemented a clean, modern design, and easy navigation for an optimal user experience. Used latest web technologies to deliver an outstanding online presence for the client.

Ed-tech Startup | AISTECHX International   May 2022 - Jul 2022
- I developed an ed-tech startup website, utilizing my skills in HTML, CSS, JS, PHP, and MySQL. My expertise in user experience and user interface design allowed me to create a website that is both visually appealing and user-friendly. I ensured that the website is optimized for both desktop and mobile devices, ensuring a seamless user experience.

eCommerce Site   Apr 2022 - May 2022
- I designed and developed a user-friendly eCommerce website for a client with a focus on an intuitive shopping experience, mobile responsiveness, and secure payment options.
