Professional Experience

IT Trainee, *FIS*   02/2022 – present
Fetching Data from the database using MySQL according to bank's daily activities.
Updating and managing database according to bank's daily activities.

Android Application Developer Intern, *Fydo* ⬈   10/2020 – 12/2020
Integration of Recharge API
Integration of OTP functionality for SignIn
Managing some functions on the server side
Integration of RAZOR PAY payment gateway
Handling real time database on Google Firebase

Projects

QEats, *Food Ordering App* ⬈   04/2023 – 04/2023
QEats is a popular food ordering app that allows users to browse and order their
favorite dishes from nearby restaurants. Built different parts of the QEats backend
which is a Spring Boot application.Several REST API endpoints are implemented to
query restaurant information and place food orders.

XMEME, *MEME Posting App* ⬈   05/2023 – 05/2023
XMeme is a simple backend web application where users can post and see memes.
Built XMeme by writing necessary GET and POST APIs for fetching and posting the
memes. Built the backend application from scratch using a spring starter template
and stored/retrieved the data from MongoDB.

QContest, *Online Coding Platform* ⬈   02/2023 – 02/2023
QContest is implemented using OOPS in JAVA. It is an online coding platform that
allows a user to sign up, create contests and participate in contests hosted by other
registered users. Users solve problems and get points based on the difficulty of the
problems and after the contest, scores of the users are updated.
