## About Me

I am skilled web developer who currently works for Kochar Infotech Ltd. With a keen eye for detail and a passion for creating visually appealing and user-friendly websites, My expertise in various web development technologies and programming languages allows him to design and develop custom web solutions that cater to the specific needs of the clients.

## Experience

### Kochar Infotech Ltd.

-> **Jan 2023 - Present**
-> **Web Developer**

As a Web Developer worked on a range of projects, including responsive websites, e-commerce portals, and web-based applications, using various technologies and programming languages.

### Accenture

-> **Nov 2022 - Dec 2022**
-> **Developer**

As a Developer, I am dealing with various kind of problem based on real world and I solve these problem using Object Oriented Programming.

## Projects

### ● Parking Management System

-> **September 2022 - October 2022**

- The main goal of this project is self-explanatory: it's a system that assists individuals, businesses, and organizations in managing their parking spaces
- Utilized tech skills such as Python, PyQT5, PHP

### ● E-Commerce website

-> **July 2020 - August 2020**

- I create a e-commerce website's frontend was developed using HTML and CSS to provide the structure and styling of the web pages. JavaScript was used for client-side scripting, such as form validation and dynamic effects.
