ASHISH KAPOOR

Address**:** A1/182A, Keshav Puram, Delhi-110035
Phone**:** (+91)9810783953   Email**:** ashishkap1999@gmail.com

SUMMARY

Software developer with experience in front-end development and back-end technologies who wants to specialize in web development. Proficient in HTML, CSS and JavaScript frameworks like Angular. Ready to help the company achieve its goals.

EXPERIENCE

O N E B C G
Software Engineer   **February 2022 – February 2023**

- Experience in working with Angular 13, modules, components templates, debugging, routing, web services, jquery and dependency injection to create SPA and web applications. Built responsive front-end web design for enhanced user interface/UI with es6 features. Worked as a front end developer/angular developer and also as a back end programmer.
- Worked extensively in the agile development process used for software development lifecycle and have an understanding of agile methodology. Involved in scrum meetings and sprint retrospective. Collaborated with the backend and QA team.
- Full stack experience in software development with restful services and API integration.
- I have also worked on dotnet and MVC and used SQL Server to write sql queries for databases using best practices. Have knowledge of continuous integration(ci/cd), code versioning tools/version control systems, TDD, BDD, and git.
- Worked on web technologies and good understanding of writing code with Dom manipulation technique and cross-browser compatibility.

PROJECTS

PAYROLL

Payroll System is a web application developed to help the organizations to manage their employee payroll reports for accuracy and make necessary adjustments through established procedures. Used Jasmine/Karma for unit tests/unit testing and material design component library.

TOPCARS

Topcars is a angularjs web application developed for users to add their favorite cars to a list. It is a prototype to show the crud operation functionality. Used HTML, CSS3, bootstrap, JSON, and Java Script/typescript.

ECRUD

Created a asp.net core web api crud operation project with angular using entity framework to show the crud functionality.
