Hiring Management System
2020
- **Language Used In Backend**:- JAVA SPRINGBOOT
- **Language Used In Frontend:- HTML CSS,BOOTSTRAP & ANGULAR**
- **Database Used:- Mysql**

A hiring management system (HMS) is a software platform used by organizations to streamline their recruitment and hiring processes. It typically includes a suite of tools designed to help HR professionals manage job postings, track applicants, schedule interviews, and make hiring decisions.

Employee Management System (Crud_Operation)
2023
- **Language Used - Java, Springboot, Html, css**

The Employee Management System is a CRUD operation project that I developed to manage employee data for a small business. This system allows users to create, read, update, and delete employee information through an easy-to-use interface.
