High School
JKG International School Ghaziabad.
(2015 - 2016)

ACADEMIC PROJECTS

Timing based water filling with RO
Final Year Project - (2021-2022)
I use stepper motor which hold the water bottles and the IR sensor which is in front of the bottles and then detects the bottle, and the sensor is connected with the water pump and fill water in every 10 seconds gap.

Touch less Water Dispenser with RO
(2020-2021)
This is a normal touch less water dispenser which uses an IC, water pump and IR sensor.
