IT MANAGED SERVICES
Software Developer | 1 Years of Experience

- Proficient in quickly grasping new technical concepts and utilizing them in a productive manner to deliver high-quality results.
- Skilled in front-end development with a focus on React-JS, React-Redux, CSS, and JavaScript.
- Experienced in using Material UI and Syncfusion to build beautiful and responsive web applications.

Overall, I am a result-oriented software developer with 1 years of experience in building front-end applications using cutting-edge technologies.

PROFESSIONAL EXPERIENCE:
Software Developer
Costacloud an Apollo Computers
05/2022 - Present, New Delhi
Paperless Office (E-office)

Data Management Application | Government Sector

- Developed and maintained a data management application for the government sector.
- Designed the application to handle approval processes across departments, from initial submission to final approval.
- Facilitated communication between government employees and departments to ensure a transparent and efficient approval process.
  - As a software developer my main responsibility was to develop software applications tailored to meet the specific needs of clients Integrated the functionality using react redux and other related libraries for enhancing the performance of existing applications. I worked on tickets and solved bugs, ensuring that the application was functioning smoothly and efficiently. I also developed sub-modules of the main application, which required strong technical skills and attention to detail.

Overall, I have experience in developing and maintaining data management applications that streamline file management and approval processes in the government sector. My focus on compliance and communication ensures that the application meets all necessary requirements while facilitating efficient approval workflows.

Vendor Portal Development

- Contributed to the development of a Vendor Portal that facilitated communication and collaboration between the client and vendors.
- Designed and implemented interactive features that enhanced the user experience for both the client and vendors.
- Worked with stakeholders to identify requirements and ensure the Portal met the needs of all users.
- Created secure login systems and access controls to protect sensitive information and maintain data privacy.
- Conducted testing and troubleshooting to identify and resolve any issues with the Portal.

Meeting Module | Government Sector
- **I have successfully** have developed a meeting module using React JS and Redux Material UI
- The module allows users to add meeting agendas and attendees, including both internal and external departments.
-After the meeting is completed, the module enables users to add decisions and tasks related to the agenda.

– Overall, this meeting module facilitates efficient and organized meetings with a comprehensive approach to handling agendas, attendees, decisions, and tasks.

Personal Projects

E-commerce   -   Developed and maintained the UI for an e-commerce website, creating a user-friendly and responsive design.
